

Smooth Surface Customizable 3D Printed Parts for Your Unique Manufacturing Needs OEM

Our Product Introduction

For more products please visit us on precision-cncparts.com

Basic Information

- Place of Origin: guangdonghuizhou
- Brand Name: ywy
- Model Number: ywy222

Product Specification

- Application: Industrial
- Color: White
- MOQ: 1 Piece
- Tolerance: $\pm 0.2\text{mm}$
- Post-Processing: Sandblasting
- Design Software: SolidWorks
- Surface Finish: Smooth
- Printing Technology: FDM
- Highlight: Customizable 3D Printed Parts,
Smooth Surface 3D Printed Parts,
OEM 3D Printed Parts

Product Description

Product Description:

Our 3D printing technology allows us to produce parts with smooth surface finishes that are ideal for industrial applications. Our sandblasting post-processing technique adds an extra layer of refinement to the final product, ensuring that you receive the best possible quality.

Our 3D printed parts are highly customizable, allowing us to create products that meet your specific requirements. Whether you need a one-off prototype or a large batch of parts, we can deliver the products you need, in the size and shape that's right for you.

Our 3D printing products are ideal for a range of industrial applications, including manufacturing, engineering, and prototyping. Our high-quality components are designed to meet your unique needs, ensuring that you receive the best possible results for your application.

At our company, we pride ourselves on our commitment to quality. Our experienced team of professionals use the latest 3D printing technology and techniques to produce products that meet your exact specifications. With our wide range of customization options and excellent customer service, we are confident that we can provide you with the best possible 3D printing products for your industrial needs.

Features:

Product Name: 3D Printed Parts

Material: PLA

Application: Industrial

MOQ: 1 Piece

Size: Customized

Surface Finish: Smooth

Our Three-Dimensional Parts product, also known as 3D Printed Goods, are made from high-quality PLA material and are ideal for industrial applications. You can order as little as one piece, and each piece can be customized to your specific size requirements. The surface finish of our Three-Dimensional Products is smooth and professional, ensuring that they look great and function properly.

Technical Parameters:

Surface Finish	Smooth
Printing Technology	FDM
File Format	STL, IGS, STP
Application	Industrial
Size	Customized
Post-Processing	Sandblasting
MOQ	1 Piece
Lead Time	7-10 Days
Printing Layer	0.2mm
Design Software	SolidWorks

Applications:

The ywy222 3D printed parts are suitable for a wide range of applications in different industries. Below are some of the product application occasions and scenarios:

Manufacturing Industry: 3D printed components are used in the manufacturing industry for prototyping and creating custom parts. The ywy222 product is perfect for this application as it can be customized to fit the specific requirements of each project.

Automotive Industry: The automotive industry requires precision and durability in its parts. The ywy222 3D printed parts can provide both of these attributes and can be used for creating custom car parts or for prototyping new designs.

Medical Industry: Three-dimensional parts are used in the medical industry for creating prosthetics, implants, and other medical devices. The ywy222 product can be customized to fit the specific needs of each patient, providing a more comfortable and accurate fit.

Aerospace Industry: The aerospace industry requires high-quality and lightweight parts. The ywy222 3D printed parts can provide both of these attributes, making it an ideal product for creating custom aerospace components.

Consumer Products Industry: The ywy222 3D printed parts can also be used in the consumer products industry for creating custom parts for products such as toys, electronics, and appliances.

With a tolerance of $\pm 0.2\text{mm}$, the ywy222 3D printed parts can provide high-quality and accurate output, making it an ideal product for various industries. Whether it is for prototyping or for creating custom parts, this product can provide the necessary attributes to meet the demands of different applications.

Customization:

Our team of experts is dedicated to providing you with 3D Printed Goods that are tailored to your exact requirements. Whether you need a specific shape or size, we can help you achieve your desired outcome. Our product customization services ensure that you get the most out of our 3D Printing Products.

Support and Services:

Our 3D Printed Parts product comes with comprehensive technical support and services to ensure that our customers are able to make the most out of their purchase. Our team of experts are available to provide assistance with any technical issues or questions that may arise during set-up or use of the product. Additionally, we offer maintenance and repair services for any damaged or malfunctioning parts. Our goal is to provide our customers with the highest level of support to ensure their satisfaction and success with our product.

Packing and Shipping:

Product Packaging:

All 3D printed parts will be carefully inspected and cleaned before packaging.

Each part will be individually wrapped in bubble wrap or foam to prevent damage during transit.

The parts will then be placed in a sturdy cardboard box with additional cushioning material.

A packing slip will be included with the order.

Shipping:

Orders will be shipped within 2-3 business days of receiving payment.

We offer standard and expedited shipping options.

Shipping costs will be calculated at checkout based on the destination and weight of the order.

We ship to most locations worldwide.

Customers will receive a tracking number once the order has shipped.

FAQ:

Q: What is the brand name of this 3D printed part?

A: The brand name of this 3D printed part is ywy.

Q: What is the model number of this 3D printed part?

A: The model number of this 3D printed part is ywy222.

Q: Where is this 3D printed part made?

A: This 3D printed part is made in guangdonghuizhou.

Q: What materials are used to make this 3D printed part?

A: The materials used to make this 3D printed part depend on the specific part ordered. Please refer to the product description for more information.

Q: Can I request a custom design for this 3D printed part?

A: Yes, we offer custom design services for our 3D printed parts. Please contact us for more information and pricing.
